**(778) 675-3306**

Dear Friends,

They say it's better to give than to receive—and I honestly feel great giving you this opportunity to give to me a viable business venture that benefits everyone involved. No need to say “thank you,” and I won't bore you with “you're welcome.” Instead, let's cut straight to the meat of it.

Here's the plan: you help me obtain a loan of roughly **\$2,850** (either through the bank or directly). The bulk of this will go toward purchasing and shipping a **tricycle rickshaw (trikeshaw)** from China.

This regal ride seats two passengers plus a driver and can be used for:

- Scenic tours around Stanley Park or downtown
- Stadium runs before and after games
- Advertising tourism-related businesses
- Film set props for Vancouver's production houses
- A rolling platform for political or cultural movements

## Revenue Projection

| Scenario     | Hours/Week | Rate/Hour | Weekly Revenue | 6-Month Total |
|--------------|------------|-----------|----------------|---------------|
| Conservative | 10         | \$30      | \$300          | \$7,200       |
| Moderate     | 15         | \$40      | \$600          | \$14,400      |
| Optimistic   | 20         | \$50      | \$1,000        | \$24,000      |

## Upfront Business Costs

- Business Licence      \$250
- Pedicab + Shipping    \$1800

## Annual Business Costs

- Pedicab permit        \$250
- Insurance               \$50
- Maintenance          \$200
- Bookkeeping          \$100

You've probably seen a few of these around town—but not many. That's the opportunity. There are 60 permits issued each year and last year's holders get first offer to renew permit.

Rain or shine, this vehicle earns its keep. Local operators currently charge **\$30–\$50 per hour**, plus tips. This is a lean, street-smart business with minimal overhead and strong earning potential.

There is a supplemental section after this page for those who want to wade in the weeds.

Thanks for reading, and if I forget to tell you later,.....you're welcome!

Feels good, right?

—David

## **Supplemental Part A: Rules & Regs**

**- City of Vancouver**

An owner of a pedicab must:

- Demonstrate, at the City's request, that the pedicab is available for transporting passengers
- Ensure that parking, storage and maintenance of the pedicab occurs only on private property, except for parking on streets in accordance with other bylaws during business hours while waiting for customers

All pedicab operators must:

- Have the brakes of each pedicab inspected at least annually by a bicycle repair shop that has a current business licence issued by a municipality, and promptly undertakes any repair or maintenance to the brakes disclosed by such inspection
- Retain the records of any inspection, repair, or maintenance for at least two years, and makes these records available to the inspector
- Inspect the brakes and other safety equipment each day prior to operating the pedicab and make adjustments if necessary
- Obey all provisions of the Street and Traffic Bylaw 2849 and Motor Vehicle Act (normally those applicable to the definition of a vehicle)
- Not stop to load and unload passengers in any location which would disrupt traffic

Pedicabs must be equipped with:

- Rear hydraulic brakes and front V-brakes, or another braking system approved by the inspector
- Front headlight and rear tail lights and rear flashing light (for night time operations)
- Turn signal lights and a standard bell
- Reflectors on wheels, carriages, and rear bumper, or similar protection
- Rear mud flaps, or similar protection
- First aid and repair kit
- Six-foot safety flag (unless rooftop design exceeds six feet)
- Business name and identification number that uniquely identifies each pedicab, and is painted or permanently affixed in figures at least 5 cm high, on each side and to the rear of the pedicab

# Supplemental Part B: Pedicab Routes – City of Vancouver
